SUBMITTAL DUE DATE **December 14, 2021 @ 2:00 PM (PST)**

Q&A ISSUE DATE Thursday, December 2, 2021

PROPOSER QUESTIONS	PORT RESPONSES	RFP/ RFQ Section
Will the new camera system be an extension of the existing system or will it be a new system with new software?	It will be an extension	
If an extension of the existing system can you disclose the brand of the cameras and software currently in use? I am looking to determine if the existing software is a product platform we are certified to support and install prior to bidding.	Installation of the cameras is required only. Access to the system will not be required.	
Could cellular CCTV's be capable for this project?	No.	
Would a bid be accepted for ONLY project 101503.01 Port Camera Expansion? We do not intend to bid the Port Admin building security enhancements project.	No. Both projects have to be bid.	

Project specifications 28 23 00 1.03 A.1.a.2&3 calls for installer manufacture certifications for both Bosch and Arecont cameras. Per Arecont manufacture representative Arecont no longer offers installer certifications, also there currently are no local vendors with Bosch certifications for installation. Due to this equipment being owner provided and owner commissioned can this requirement be removed from the project requirements for mounting and aiming of the cameras?
