

Port Maritime Center Fact Sheet

The Port of Tacoma and Tacoma Public Schools are working in partnership to develop a landmark campus on the Tacoma waterfront called the Port Maritime Center. The Maritime Center will be home to a new Port business office and the Maritime|253 skills center, providing opportunities for high school students across Pierce County to develop skills and education leading to a career in the maritime and industrial trades. The Port's master planning process includes engaging with the community to gather feedback to help envision the future of the site.

Location

The Port Maritime Center is located on a 20-acre parcel of Port-owned property along the east side of the Foss Waterway, south of the Murray Morgan Bridge (11th Street Bridge) in Tacoma.

Design-Build Team

- TCF Architecture and BNBuilders

Port Business Center

- 60,000 sq. ft. building
- Workspace for approximately 150 Port and NWSA staff
- Port Commission meeting chambers
- Public walkway and waterway access

Maritime 253 | Skills Center

- 30,000 sq. ft. building
- Operated by Tacoma Public Schools
- Up to 300 students per session (two per weekday)
- Workspace for 20 staff
- Career/technical education open to junior/senior-level high school students throughout Pierce County at no cost
- Educational focus areas: skilled & technical trades, transportation & logistics, technology & innovation, and sustainability in the maritime industry

Master Planning

Master planning includes the 20-acre parcel, where the Maritime Center will be located, and a second 5-acre parcel on the opposite side of the Wheeler-Osgood waterway.

Port Maritime Center Fact Sheet
