1	Port of Tacoma	# QUESTIONS & RESPONSES
2		
3	**RFP or RFQ / TITLE**	**070076 IT Cybersecurity Assessment and Plan**
4	**CONTACT**	**Michael Keim, CPPB, Sr. Contract Adminstrator**
5	**EMAIL**	**procurement@portoftacoma.com**
6	**PHONE NUMBER**	**253-428-8608**
7	**SUBMITTAL DUE DATE**	**Monday, February 23, 2015 @ 4:00 P. M.**
8	**Q&A ISSUE DATE**	**DATE @ X:XX PM (PST)**
10	**PROPOSER QUESTIONS**	**PORT RESPONSES**
11	How many "systems" are in scope for assessment (approximately how many physical and virtual servers)?	There are two primary domains to address in the assessment. The total number of systems are 86 VMs and 51 physical servers.
12	Are all servers AND employee workstations to be covered under this assessment, or will a sampling of employee workstations be sufficient?	This project has a fixed cost, not-to-exceed $100K. It is in the Port's interest is to assess all the servers mentioned above and the 258 workstations.
13	Can work be performed remotely (as applicable) or is there a requirement to be 100% on-site?	The Port is open to discussing the effort that can be done remotely.

	A	B
14	Are there any requirements to perform ongoing vulnerability scans to track progress/performance?	Beyond the scope of work defined in the RFP the Port would not require ongoing scanning.
15	We were wondering if you had reverse engineering malware and/or exploits in mind as part of this RFP?	Nothing in particular. However, last September the Port was exploited with the CyptoWall malware. It would be interesting to know the post event artifacts left behind.
