PHONE NUMBER 253-538-8383

PROPOSAL or RFI DUE DATE June 23, 2017 @ 12:00pm (PST)

DATE ISSUED June 1, 2017

PROPOSER QUESTIONS	PORT RESPONSES	RFI Section/Pg
Whether companies from Outside USA can apply for this? (like, from India or Canada)	Yes	
Whether we need to come over there for meetings?	Yes	
Can we perform the tasks (related to RFP) outside USA? (like, from India or Canada)	Not sure how this would work or how it would be possible.	
Can we submit the proposals via email?	Yes. Keep in mind, this is only a Request For Information and not for Proposals. The costs requested are for budgetary purposes only.	
The RFI notes that questions may be submitted to you at this e-mail address. Our question, after a careful review of the RFI, is What is the impetus for the issuance of the RFI by the Port (aged or malfunctioning systems, known security system failures or security breaches, the need to meet adopted standards, other)?	We've had security breaches at one of our locations and multiple lost master keys within the Port. We need a new system that can reduce/eliminate costs to rekey the Port, increase security, and be accountable for all outstanding keys that can enter our properties.	
Will you be scheduling meetings with potential vendors for your current open project?	We may after we review the responses to the RFI but not before.	

Do you require the access control system to integrate with any existing systems such as video management, intrusion, 3rd party software?	No	
If so, can you please state each desired system?	N/A	
Will there be a location for a telephone entry system that will integrate with the access control system given the mention of a tenant building?	No	
Do you have any government and/or federal regulations and requirements that the access control system must meet?	We we must have locks on our gates that lead into secure and restricted areas. Security does not nor do we wish to issue those keys. The regulations do not state what type of locking system is required, (for pad locks).	
Do you currently have connectivity between all the locations that will be covered by the access control system? Fiber?	No	
If no current connectivity, do you plan to have it?	No
