Q&A ISSUE DATE July 9, 2020 @ 9:40 AM (PST)

PROPOSER QUESTIONS	PORT RESPONSES	RFP/ RFQ Section
We were wondering how the Port came up with a Substantial Completion time of 160 calendar days (approx.. 5.25 months); when the precaster (Concrete Tech) has a backlog of over 6 months? Will the project be awarded such that the contract time will not start until we have a firm delivery date of the precast slabs?	The contract time starts at contract execution per section 00 52 00. The Port has no comment on the number of available suppliers or their perceived backlog.	
Can you please request clarification from the project manager on the below requirement as it says "appropriate to the Contractor's Profession and Work". It appears they want a cyber policy and it's not clear why they would want that for this project. 4. Technology Professional Liability Errors and Omissions Insurance appropriate to the Contractor's profession and Work hereunder, with limits not less than \$2,000,000 per occurrence. Coverage shall be sufficiently broad to respond to the duties and obligations as is undertaken by the Contractor in this contract and shall include, but not be limited to, claims involving infringement of intellectual property, copyright, trademark, invasion of privacy violations, information theft, release of private information, extortion, and network security. The policy shall provide coverage for breach response costs as well as regulatory fines and penalties as well as credit monitoring expenses with limits sufficient to respond to these obligations. The Policy shall include, or be endorsed to include, property damage liability coverage for damage to, alteration of, loss of, or destruction of electronic data and/or information "property" of the Port in the care, custody, or control of the Contractor.	The Port uses a Web-based Construction Management system that the successful contractor and Port will use for this project (RE: Division 01, Section 01 31 23). The required policy is based on the Contractors use of the system
